

DESCRIPTION

ECOBIRDNEX® is an ecological vibrating ribbon with acoustic and optical effects that provides very effective protection against birds.

It is one of a kind, unlike other systems, given that the birds do not get used to the changing acoustic and optical effects. It does not bother the neighbours at all. It also vibrates with the lightest breeze, producing gentle sounds and movements that change constantly which the birds cannot tolerate.

ECOBIRDNEX® does not require any maintenance and is totally effective and inoffensive.

It is available in 30 metre rolls to cover 600 m² and 500 metres to cover 1 hectare.

SANIDAD AGRÍCOLA ECONEX, S.L. only guarantees the composition, formulation and content of the products, taking responsibility for the direct, immediate and exclusive damages caused in the composition, formulation and content of the products sold. **SANIDAD AGRÍCOLA ECONEX, S.L.** will not be held responsible for damages produced by factors beyond the company's control that have either totally or partially contributed. For instance, the weather conditions, usage or mixing with other products, amongst others. In addition, **SANIDAD AGRÍCOLA ECONEX, S.L.** will provide recommendations and information supported by extensive and meticulous research and tests; which must be taken into account by the customer when using the products. The customer will be responsible for any damage caused, in whole or in part, for the total or partial non-observance of the instructions provided. Furthermore, the customer will be responsible for all that is referred to as the performance of the products; which comes from total or partial non-observance of the instructions and information provided by the company.

RECOMMENDED USE

Install the vibrating ribbons before the birds can damage the harvest fruits. Place the ribbon in sections of 4 to 8 metres with any type of support, securing it by twisting the ribbon two or three times around each peg. Make sure it is tigh enough to avoid spirals, until completing the necessary length.

ECOBIRDNEX®
30 m roll.

**PATENTED
PRODUCT**

ECOBIRDNEX®
500 m roll.

HEIGHT

For small crops, place the ribbons at a minimum height of 90 cm from the ground. In groves or vineyards always place the ribbons above the crops to assist the movement of the wind.

DISTANCE BETWEEN THE RIBBONS

Install the ribbons with a separation of approximately 9 metres for gardens and small crops, and 25 metres for larger areas.

TECHNICAL OBSERVATIONS

The **ECOBIRDNEX®** vibrating ribbon is more effective by placing it directly facing the wind.

Where greater protection is needed, the ribbons can be placed closer to one another or overlapped at different heights.

For better conservation, it is recommended to use round pegs covered with a layer of plastic to avoid rubbing against each other.

These instructions are only a guideline and it is recommended to carry out various tests to obtain optimum results depending on the area of application.

ADVANTAGES:

- Bird droppings are avoided
- Crops are protected
- Ecological system
- Inoffensive
- Non-toxic
- Safe to use
- Easy to install
- Does not require any maintenance
- Effective up to a year
- Economical
