## DESCRIPTION

The ECONEX POLILLERO trap is made of plastic polymer that does not smell when heated by the sun and can withstand ultraviolet rays. It has an average shelf life of 6 to 7 years. It consists of a yellow funnel with a green lid and a white base attached to it.

It is the most appropriate trap for the majority of butterflies, especially the biggest moths when there is a large number, due to its large capacity.

The inside of the base should be filled with liquid to kill the captured insects, preventing them from escaping. Oily liquids or propylene glycol (antifreeze) are recommended to reduce evaporation.

The pheromone diffuser is placed in a small cage in the centre of the lid. The trap is supplied with two hooks to be able to hang it.

As well as capturing butterflies, it is also useful for capturing flies and beetles. It is the ideal trap for areas where there is a lot of dust. This trap allows for the insects to be captured intact, undamaged, which allows for a better morphological study of them.

## PACKAGING

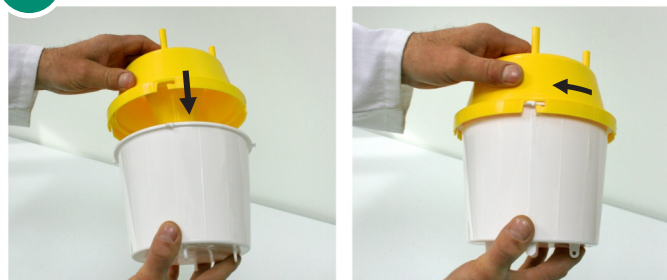

It is sold in boxes of 35 units.

## STORAGE

The trap should be stored in its original packaging in a dry place and protected from direct sunlight.

## ASSEMBLY INSTRUCTIONS

1

Place the funnel on the base of the trap and fit it together by twisting until it links with the tabs of the base.

3

Position the pheromone diffuser in the cage and put the plug in.

5

Put the hanger on the lid.

2

Place the lid by making the ends of the funnel stems coincide with the inside holes of the lid, pressing down until they are firmly fitted together.

4

Introduce the cage through the hole at the centre of the lid, pressing down until it is firmly fitted in.

6

The trap is ready for you to use.
