■ Detailed description of the main forest pests.

- Morphology and biology
- Detection and monitoring
- Exhaustive monitoring
- Symptoms and damages
- Period of use
- Necessary material

■ Traps for the control of forest pests.

- Detailed description.
- Positioning and use.
- Trap models.
- Accessories.

■ Auxiliary products.

■ Monitoring service for forest pests.

SANIDAD AGRICOLA ECONEX S.L. has an expert technical team, made up of doctors and graduates of biology, technical engineers and technical specialists with a vast experience in forest entomology. The service includes:

- Personal assistance from assigned personnel.
- Periodic and occasional field visits.
- Evaluation of damages, levels of infestation and thresholds of tolerance.
- Installation and trap monitoring.
- Evaluation and monitoring of the associated insect community (predators, parasitoids, competitors, commensals etc.).
- Digital map-making and modelling of the damage distribution.
- Writing reports.

With this service ECONEX covers the need for highly qualified staff for problems relating to Forest Health.

In this way, the service offered is an important tool contributing to the knowledge or resolution of problems produced by organisms or harmful agents to forest plants, ornamental plants, unique and monumental trees, forests, protected natural areas and landscapes.
